

MISSION REACH ECOSYSTEM RESTORATION AND RECREATION PROJECT

The Mission Reach Ecosystem Restoration and Recreation Project is transforming an eight mile stretch of the San Antonio River into a quality riparian woodland ecosystem. This unique project restores riverine features and riparian woodlands, reintroduces native plants, enhances aquatic habitat and reconnects cultural and historical features.

If your classroom or organization is interested in learning more about the Mission Reach Ecosystem Restoration and Recreation Project, the San Antonio River Authority (SARA) has developed a presentation about this project for schools, churches, civic groups, neighborhood associations and other community organizations.

To learn more about this free service or to schedule a presentation, please contact Matthew Driffill, SARA's Education Specialist, at 210-302-3222 or e-mail mdriffill@sara-tx.org.

Key Points of the Mission Reach Presentation:

- History of the San Antonio River
- Current Status of the San Antonio River
- Explanation of Ecosystem Restoration
- Mission Reach Features and Goals
- Project Construction
- Future Operations and Maintenance

To learn more about this free service or to schedule a presentation, please contact Matthew Driffill, SARA's Education Specialist, at 210-302-3222 or e-mail mdriffill@sara-tx.org.
